

MILOSZ SOBIECKI

QA Automation Engineer

Gdańsk, Poland | +48 665 197 403 | sobiecki.mj@gmail.com | [linkedin.com/in/milosz-sobiecki](https://www.linkedin.com/in/milosz-sobiecki)

PROFILE

QA Automation Engineer with 5+ years of experience across web, mobile and API-based systems, including fintech and payment workflows. Hands-on experience building automated REST API checks in TypeScript/Node.js, maintaining Cypress and Playwright suites, validating SQL data and asynchronous integrations, and supporting quality from feature design through release. Comfortable owning backend-heavy test scenarios, diagnosing failures from logs and data, and using AI-assisted tools to accelerate test design and automation.

CORE EXPERTISE

Automation: TypeScript/Node.js, Cypress, Playwright, Mocha, Chai, Supertest	Backend & API: REST API, integration and E2E testing, Postman, JSON, auth flows
Data & messaging: PostgreSQL/SQL, data validation, AMQP, asynchronous workflows	Delivery: CI/CD pipelines, Git, regression strategy, UAT and release readiness
Performance: JMeter, load scenarios, result analysis and bottleneck investigation	AI in QA: AI-assisted test generation, prompt/output validation, GenAI regression

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer

Aug 2022 - Mar 2024; Jun 2025 - Present

Boldare | Gliwice / remote

- Design and maintain automated REST API checks in TypeScript/Node.js using Mocha, Chai and Supertest/Superagent for complex end-to-end business workflows.
- Validate backend integrations, asynchronous AMQP flows, PostgreSQL data, generated reports and high-volume datasets across distributed services.
- Develop and execute JMeter load scenarios, analyse response times and resource saturation, and communicate performance risks before release.
- Maintain Cypress/Playwright regression coverage and support CI/CD execution, failure analysis, UAT and production readiness in regulated environments.
- Use AI-assisted tooling for test design, automation support and analysis while reviewing generated output for correctness and maintainability.

Quality Assurance Engineer

Mar 2024 - Jun 2025

Bright Inventions | Gdańsk

- Owned functional, exploratory and regression testing of web and mobile products for international clients, including fintech and payment-related flows.
- Tested REST APIs, authentication and integrations with Postman; verified persisted data with SQL and diagnosed issues using application and device logs.
- Created test plans and release evidence, collaborated directly with developers and stakeholders, and supported mobile-store and production releases.

Junior Software Test Engineer

Jun 2022 - Aug 2022

EPAM | Gdańsk

- Designed web test scenarios from requirements and wireframes, executed smoke/regression testing and contributed Cypress UI automation.

Junior Software Tester

May 2021 - Jun 2022

SentiOne | Gdańsk

- Tested conversational AI products and APIs, covering intents, edge cases and regression of NLP/LLM and generated-output behaviour.

Junior Software Tester

Jan 2021 - May 2021

Interactivo | Gdańsk

- Executed functional and regression tests, created test cases, reported defects in Jira and verified fixes.

EDUCATION & LANGUAGES

MSc, IT and Econometrics

University of Gdańsk, 2022-2024

BSc, IT and Econometrics

University of Gdańsk, 2019-2022

Languages

Polish - native | English - C1 | Italian - B1

Availability

Gdańsk / hybrid | Remote across Poland | B2B
